

# KikStart<sup>®</sup> Fertiliser

Fertico has continued to manufacture a range of **Organic Based Fertilisers** in a granulated form unlike other pelletised and extruded products on the market.

These granules have gained popularity due to their effectiveness, natural and safe properties.

**KikStart** has been the most popular general purpose organic based fertiliser product for Fertico for many years.

**KikStart** and **KikStart Extra** are used effectively on most horticultural soil types. Custom-made mixes are also available to suit specific soil requirements.

**KikStart** has good levels of organic carbon, N & P plus natural trace elements to suit all crops.

**KikStart** is a general purpose safe organic based fertiliser for all plants

## Features & Benefits:

- Granule for ease of handling, suitable for standard fertiliser applications.
- Nutrients from composted manure ensures minimal nutrient loss to atmosphere or leaching.
- Adds organic matter and natural humus to help feed microbiology and build soil carbon
- Compatible with inorganic and biological fertilisers
- Unique nutrient release pattern, feeding the plant as it requires
- Improves the growing environment and enhances nutrient uptake
- Low Odour and cost effective
